A Historical Comparative Gazetteer for Nubia

Daniele Salvoldi and Klaus Geus¹

Introduction

In 1960, in the wake of the Egyptian Government's announcement that the Aswan Dam would be once again heightened, this time creating a permanent lake to extend 500 kilometers deep into Nubia, many institutions answered the UNESCO call to save the ancient monuments. Frenetic work of documentation and survey (both archaeological and ethnographic), excavation, and rescue of the most important buildings began.²

The result of this incredible international joint effort was the salvage of many important monuments and an extensive work of survey and mapping of the area that would soon be lost forever. The publication of these data, which sometimes occurred decades after the fieldwork, was an important milestone for Nubian studies and it is still to-date the base for every regional work, unrivalled for accuracy and amount of information.³

¹ This article is a by-product of the project "Locations, Relations and Interactions: Mapping and Interpreting the Ancient Landscape of Nubia through the Unpublished Archive of William John Bankes (1815–1822)" at the Dahlem Research School of Freie Universität Berlin. The project aims at the creation of a historical *cis* of Nubia using the Bankes Archive. We should like to thank the editors of this *Dotawo* special issue for their encouragement, and the anonymous reviewers of this paper for their valuable suggestions. Our thanks to Dr Søren Lund Sørensen for editing the manuscript.

Nineteenth-Century Explorations

There is nevertheless a huge amount of geographical information recorded by travelers and scholars in the first half of the 19th century that has not been yet thoroughly studied. It was a particularly fertile period for exploration, as the Turco-Egyptian armies conquered Nubia and Sennar and opened them up for foreign travelers with an interest in geography and history.⁴ In the period between 1819 and 1822 in particular, a large number of European and us explorers travelled and recorded the Middle and Upper Nile regions; some of them produced important travelogues, drawings, and maps.

In 1819, even before the military expedition set off, two different parties were travelling up the Nile: English gentleman William John Bankes with a large retinue,⁵ and French architect Jean-Nicholas Huyot with his German colleague Franz-Christian Gau.⁶ The latter left a printed account of his journey, with many beautiful plates.⁷ Bankes only edited the journal of his employee Giovanni Finati,⁸ despite having amassed an impressive collection of drawings and notes, which were never published.⁹ Huyot drew a map of Lower Nubia (First to Second Cataract) that was left unpublished, perhaps due to its lack of precision.¹⁰

With the expedition of Isma'il Pasha leaving Egypt in 1820 there were French naturalist Frédéric Cailliaud and us artillery officer John Bethune English, who both left travel accounts of their journey.¹¹ While Bethune English is quite uninformative, Cailliaud's text and maps are formidable resources.

In November 1820, British clergymen Bernard Hanbury and George Waddington left Wadi Halfa looking for the ruins of Napata

Age. Previous important work in the area include WEIGALL, *A Report on the Antiquities of Lower Nubia*; REISNER, *The Archaeological Survey of Nubia*; ROEDER, *Les temples immersés de la Nubie*; FIRTH, *The Archaeological Survey of Nubia. Report for 1908–1909*; Id., *The Archaeological Survey of Nubia. Report for 1909–1910*; Id., *The Archaeological Survey of Nubia. Report for 1910–1911*; EMERY & KIRWAN, *The Excavations and Survey between Wadi es-Sebu and Adindan 1929–1931*. More recent work in areas later flooded by other dams or threatened by future dams include, among others, WELSBY, *Survey above the Fourth Nile Cataract*; Żurawski, *Survey and Excavations between Old Dongola and ez-Zuma*; DRZEWIECKI, *Fortresses of Sudan*; OSMAN & EDWARDS, *The Archaeology of a Nubian Frontier*; ANDERSON & WELSBY, *The Fourth Cataract and Beyond*; RITTER, "A New Topographic Map of Mograt Island."

⁴ For an introduction to the historical events of the period see FAHMY, "The Era of Muhammad 'Ali Pasha, 1805–1848."

⁵ On this remarkable traveler see USICK, *Adventures in Egypt and Nubia*.

⁶ On Huyot see PINON, "L'Orient de Jean Nicolas Huyot: le voyage en Asie-Mineure, en Egypte et en Grèce (1817–1821)"; on Gau see KRAMP, *Köln/Nil: Die abenteuerliche Orient-Expedition des Kölner Franz Christian Gau 1818–1820*.

⁷ GAU, *Les antiquités de la Nubie ou Monumens inédits des bords du Nil*.

⁸ BANKES, *Narrative of the life and adventures of Giovanni Finati*.

⁹ SALVOLDI, *Catalogue of William John Bankes (1786–1855): Egyptian Drawings*.

and Meroe. They believed to have found Meroe at Jabal Barkal, but they were soon proved wrong by the explorations of Cailliaud and Linant de Bellefonds; when the latter published their travelogue they were forced to drop their claim.¹² Shortly after, in the summer of 1821, another party funded again by William J. Bankes and composed of French explorer Louis Linant de Bellefonds, Italian physician Alessandro Ricci, and Italian dragoman Giovanni Finati left Cairo with the specific task of finding Meroe. Only Finati published a short travelogue.¹³ Linant's diary was edited by Margaret Shinnie more than a hundred years later,¹⁴ but most of the notes, drawings and map by himself and Ricci are still unpublished.¹⁵ In addition to these important documents, there are other sources that are extremely useful for this compilation of toponyms, sometimes confirming names attested only once elsewhere. These are the maps of Lower Nubia by Henry Parke and Joseph J. Scoles (1829) and Anton Prokesch von Osten (1827), also stretching south until the Second Cataract.¹⁶

The Gazetteer

The comparative gazetteer presented here offers the traditional information associated with such a database: an ID number, a toponym, the district it lays in, a set of coordinates referring to latitude and longitude, and the type of features on the ground. These types are sometimes specific to the area and include cultural features such as "settlement," "monument" or "area" and natural features such as "island," "mountain," "rocks," "wadi" (a seasonal stream valley), "aqaba" (a mountain pass), "khawr" (an inlet), "cataract," "lake," "river," "spring," "well" or "forest."

The gazetteer lists the few ancient (Egyptian, Meroitic) and classical (Greek, Latin) names,¹⁷ as well as the toponyms as given in Linant, Ricci, Cailliaud, Prokesch von Osten, Parke and Scoles, Waddington, and Hanbury, to account for different spellings in English, French, Italian, and German.

¹² WADDINGTON & HANBURY, *Journal of a Visit to Some Parts of Ethiopia*; maps based on their travelogue were published in London (John Murray) and Weimar (Verlag des Geographischen Instituts) in 1822.

¹³ BANKES, *Narrative of the life and adventures of Giovanni Finati*.

¹⁴ SHINNIE, *Linant de Bellefonds, Journal d'un Voyage à Meroe dans les années 1821–1822*.

¹⁵ Ricci's own travelogue, recently re-discovered, is under publication, SALVOLDI, *The Doctor and the Pasha: Travels of Alessandro Ricci of Siena in Nubia, Siwa, Sinai, and Sennar (1817–1822)*.

¹⁶ PARKE, MILNE & SCOLES, *Map of Nubia: Comprising the Country between the First and Second Cataracts of the Nile*; PROKESCH-OSTEN & WÖBER, *Land zwischen den kleinen und großen Katarakten des Nil*.

¹⁷ As per BAINES & MÁLEK, *Atlas of Ancient Egypt*; TALBERT, *Barrington Atlas of the Greek and Roman World*.

In the last four columns, we present references to other gazetteers such as the Digital Topographical Bibliography, Trismegistos, GeoNames, and Pleiades.¹⁸

The Toponyms

A large number of these toponyms were recognized with the use of modern maps, in particular the Sudan Survey maps published between 1901 and 1937, the US Army Map Survey Series Y502 (1953–1960) and P502 (1953–1959), and the General'nyj Štab K 4020 series (1978). These maps were georeferenced with the use of GIS technology (in this case using QGIS); latitude and longitude of the toponyms were captured using a specific plug-in.

The gazetteer features 1505 entries, most of them single toponyms, but in some cases repeated toponyms for different monuments in a given site (e.g., Murwaw and Murwaw [tombs]). As far as possible, toponyms were given in the standard Arabic transliteration, with the exception of names well-established in English literature (e.g., Merowe). The gazetteer features also unidentified toponyms, an asterisk marking a reconstructed name out of the defective spelling given in the source. Recurrence of an unidentified toponym in the sources reinforces its existence, while in other cases we are to believe the toponym was recorded incorrectly by the source, the spelling is too defective or it is actually an existing unidentified toponym. In some cases, the maps show that some toponyms were either repeated with a different spelling or misplaced, suggesting that maps were created at a later stage with the use of notes and sketches, some of them still surviving.

In some other cases, unattested toponyms were inferred from nearby homonymous features (e.g., Jabal Shaqiq* inferred from Naj Shaqiq): in this case, the coordinates of the feature is tentative (Jabal Shaqiq* must be a mountain in the vicinity of Naj Shaqiq). In other cases where the toponym is unidentified but the geographical description is accurate enough to point to a relatively precise position on the map, tentative coordinates are given. Whenever this is not possible, only the toponym is marked. The inclusion of tiny hamlets at the expenses of larger centers shows how arbitrary was sometimes the selection operated by our travelers, or by the circumstances of their journeys, when composing their maps.

The column “Classical authors” tries to bring together ancient toponyms with their modern counterparts. Since the knowledge of Greek and Roman authors on Nubia was quite limited and/or garbled (as in the cases of Pliny and Ptolemy), only tentative identifi-

¹⁸ See bibliography for the references.

cations can be achieved here. Unwarranted or improbable ones are left out, possible ones are marked with a question mark. We give both the Greek (in transliteration) and Latin toponyms according to modern standard editions.
